Have you ever had an idea that would inspire people to join the climate movement in CT?

Do you have skills or experience that can help 350 CT speed up the transition away from fossil fuels?

Being a member-driven organization means we ALWAYS value and welcome new ideas, improvements, and even criticism at our regular meetings.

We have scheduled an assembly in August for this specific purpose. We need as many climate activists as possible to join us to propose, discuss and adopt policies, practices, structures, and action proposals that will make 350 CT successful in creating a Fossil-Free Future.

Our voices are stronger when they are joined together!
